JS 01 EN

## WHAT IS JAVASCRIPT

Javascript is one of the most widely used computer languages. Javascript lets webpages move and change.

## HELLO JAVASCRIPT.

Hello JavaScript.

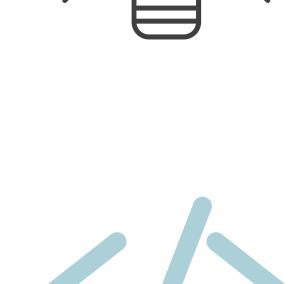

> console.log('Hello World')

Qu'est-ce que ça fait ?

## WHY LEARN JAVASCRIPT?

Typed code allows complex concepts to be written in just a few lines. These concepts allow web pages to talk to other computers.

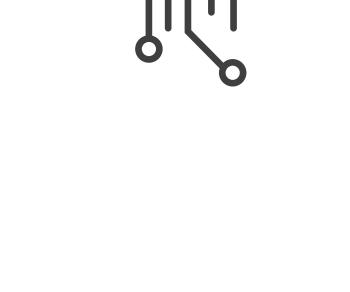

## LET'S WRITE SOME JAVASCRIPT.

Let's start by using the terminal of our browser

## WEB DEV

Build your first server using google's Colab servers
